

325

Resist / Organise / Replicate

325 is an anti-capitalist & anarchist magazine reproducing insurrectionary news and ideas from around the world. We carry extensive news reports about international resistance to capitalist domination of the planet. Four years have passed since the first issue was printed by the irrelevant scoundrels that pose as editors. Since then, our writers have given first hand reportage and analysis on, amongst other things, the Anti-G8 events of Germany 2007, (the biggest police and military operation by the German state since World War II), the 'CPE' labour-rights mass incident in France, 2006, which paralyzed the country, as well as being on the scene for the extensive and furious French Ghetto riots of 2005. Also covered has been the Anti-G8 'Suicide (Black) Blok' in Gleneagles, Scotland, 2005, which gave the London Metropolitan police a well deserved Euro-style beating; At CzechTek 2005 - our writers were in the thick of the resistance against the brutal police shut down of Europe's premier free-party...

325 is no idle journalism, we print contributed reports from the insurrectionists themselves, not only from those on the streets fighting back, but we don't forget those locked down - 325 gives a lot of space for prisoners to express their discontent, to make visible the hidden places of Capital and to enable people to contact and act in solidarity with them.

As a project 325 focuses on the anti-prison struggle as an aspect of anarchist community organisation that seeks to abolish all bosses, landlords, politicians, police, and judges - All hierarchy must go! The ever-growing prison society that surveillance and exploitation has created in our world, helped by the latest technologies must be destroyed.

As long as we can make it possible 325 will continue to report other incidents of conflict with the state and financial bodies and their paid servants. In an increasingly repressive Europe, subversive publications and the activity reported in them is targeted by the state as "terrorist". We know who holds the real terror - all those who direct armies to mass-murder through the exploitation of the people and the biosphere, violently preventing any resistance to their brutal order. The energy crisis of industrialisation and the ongoing total ecological meltdown means that opposition to this system must critically undermine all the repressive forces within and without, to overthrow the entire system which is killing all life on this planet.

Industrial modernity and the technological society have wrought cataclysmic changes on our species and the Earth, the coming years are critical. It is time to act, without waiting.
